- **1+ years** of experience in Automation and manual testing for both Web and Mobile Applications.
- Work Experience in **Automation Testing:**
  - ✓ **Selenium Testing Tool**.
  - ✓ **Code Maintenance** for mobile and web applications.
  - ✓ **Maven testng** and **Cucumber** framework.
  - ✓ **Core JAVA** based coding.
  - ✓ **Appium inspector –** Inspect element for mobile application.
  - ✓ **Vysor -** control Android device on your computer.
  - ✓ **Lambda test** – Cloud based testing for automation.
- Work Experience in **Manual Testing**:
  - ✓ Mobile application and Web Application testing.
  - ✓ Agile methodology – JIRA board.
  - ✓ Writing Test Cases for new functionality.
  - ✓ Updating the new test cases in testing board.
  - ✓ Labelling Work on Quantum GIS, & Google Earth.
  - ✓ Work Experience in JIRA Tool with Agile Methodology.
  - ✓ Work Experience in Writing Test cases and updating in JIRA testing board.
- Work Experience in Agile Methodology and using JIRA Tool.
- Experience in Writing Test cases and updating in JIRA testing board.

Technical Skill

Programming Language	**Core Java, SQL, HTML**
IDE & Tools	**Intelij IDE, Appium inspector , Vysor, Lambda Test & Postman**
Domain	FinTech, Automation / Manual Testing
Frameworks	**Cucumber, Selenium**

Professional Background

Sep 2022 - Current	Nearby Technologies Private Limited, Chennai.
2020 - 2021	Ziksa Consulting Solution Pvt Ltd, Tiruvallur

Education and Training

2022	University College of engineering, Kanchipuram	(65%)
2015	HSC, State Board, Vandavasi	(76%)
2013	SSLC, State Board, Vandavasi	(83%)

Certifications

Selenium Automation & Manual Testing	QSpider Software Training Institute, Chennai	Core Java, SQL, HTML, Maven testng, cucumber framework, Agile methodology
Junior Diploma in Computer Science	CSC Institution	Microsoft Word, Word Processing, Microsoft Excel, Spread Sheet, Power point Presentation, MS Paint, Email, Internet

Experience

DMT Service – PNB Retailer Mobile & Web

Description: DMT - The PayNearby store application offers the direct money transfer service through both web and mobile applications. It can have n customers and is used to transfer money from a recipient to the sender through a retailer's store. Commissions from each transaction to the retailer are how it makes money.

> **Roles:**
> - *Automation Testing* – Support and Maintenance automation code on weekly basis and implement new enhancement.
> - *Manual Testing* – Manual testing on new enhancement.

MTB Service – PNB Retailer Mobile & Web

Description: MTB – Move To Bank feature is accessible through both mobile and web application in the PayNearby, The retailer uses it to move money from his wallet to his own bank account. The store receives commission for each service rendered through the application, which is how the wallet amount is determined.

> **Roles:**
> - *Automation Testing* – Support and Maintenance automation code on weekly basis and implement new enhancement.
> - *Manual Testing* – Manual testing on new enhancement.

MTW Service – PNB Retailer Mobile & Web

Description: MTW – Both mobile and web applications for the PayNearby store application offer the Move To Wallet service. Money is moved from the settlement ledger to the primary wallet using it. The distributor or the corporation loads the main wallet, and the retailer's commission loads the settlement ledger. The retailer's commission can be added to the main wallet by using this move to wallet function.

> **Roles:**
> - *Automation Testing* – Support and Maintenance automation code on weekly basis and implement new enhancement.
> - *Manual Testing* – Manual testing on new enhancement.

MTD Service – PNB Retailer Mobile & Web

Description: MTD – Both mobile and web applications for the PayNearby store application offer the Move to Distributor feature. Money is moved from the settlement ledger to the distributor using it. Every retailer has a distributor, and the distributor receives a portion of the commission based on the retailer's commission.

> **Roles:**
> - *Automation Testing* – Support and Maintenance automation code on weekly basis and implement new enhancement.
> - *Manual Testing* – Manual testing on new enhancement.

Automation Testing (Mobile & Web)

Description: In terms of automation, we are moving forward with automating the sanity flow within the mobile and online applications. To check if the sanity flow is operating correctly, we will run the scripts for the DMT, MTB, MTW, and MTD services locally and in the cloud once a week. We must update this script and add it to the development branch in case any scenarios do not work as intended.
